A Unit of VPS Healthcare

Anaesthesiology

Anaesthesiology plays an essential role during surgery and in many other areas and our anaesthesiologists must possess a rare level of skill and undergo many years of training.

Many patients will begin their journey to total wellness in the Anaesthesiology department as they visit us for a mandatory pre-anaesthesia check-up.

Led by highly trained and expert anaesthesiologists, this department provides pre-operative, intra-operative and post-operative anaesthetic expertise to all surgical specialties of the hospital.

But administering anaesthesia is only one of the team's responsibilities, they also provide care on many other levels - including surgical, diagnostic and therapeutic procedures, pain therapy and intensive care - around the clock.

KEY AREAS OF EXPERTISE:

- Preoperative Anaesthetic Evaluation
- Administration of Anaesthesia
- Preoperative pain management
- Diagnosis and management of acute and chronic pain
- Injections and nerve blocks
- Obstetrical analgesia and anaesthesia

To make an appointment for a consultation, Please contact us at the following numbers: 800 900 600 / 026 900 600 or book through our website: www.medeor24x7.com
